

I would like to order the following files:

The logos need to be centered and without extra padding – the graphic should go all the way to the ends of the container.

1. Logo in Black only with the woman, the tree and the path -remove the mountains and the vandrekalendar text on top
2. Logo in White only with the woman, the tree and the path -remove the mountains and vandrekalendar text on top.
3. The same logo in black with woman, tree and path but also with the Vandrekalendar text on top.
4. The same logo in white with woman, tree and path but also with the Vandrekalendar text on top.
5. I will need the logo only with the woman for a favicon. Provide both svg file only with her and a PNG file 512x512 px. This should be the black version
